Local News

Mrs. Thompson of Alia is visiting with her sister Mrs. A. Ray during the Chautauqua.

C. B. Dawdy visited his brother in Red Deer Sunday, and says the roads were very bad, the Calgary Edmonton trail being nearly impassable.

Mrs. Healy left Saturday for Edmonton by car.

The crops throughout the district are looking exceptionally good. Some hail is reported north, but considerably less than last year. Cutting in the south will likely commence within a couple of three weeks, a large number of combines have been sold this season.

Mr. and Mrs. Brown and family visited with Mr. and Mrs. Flewelling last week.

Mr. and Mrs. I. Sorum are back from an extended visit to the States.

A. H. McKenzie fired to Tofield Monday.

Miss Alberta McKenzie had the misfortune to cut her foot while splitting wood.

David Whiting happened an injury to his arm on Tuesday morning when he slipped from a shelf in the express room of the depot. Several stitches were required.

A pansy contest was staged on Monday under the auspices of the W. L. The judges were Rev. R. T. Harden and Rev. Mr. Morgan and Mrs. Oldring. Mrs. McCormack took the prize.

Mr. Justin Groat of Hanna stayed in town Monday on his way to Rocky Mountain House.

Mr. Mrs. King visited friend the Ripley district during the weekend.

A Ford car while proceeding north on Journal street was seen to hesitate considerably, and when finally R. Conway's milk wagon appeared on the scene Lizzie headed straight for the brush.

Board of Trade Meeting

The Board of Trade met on Friday evening August 10th when quite a large number were present. Mrs. Stanley Roper presided over the meeting.

Lunch was served by the W. I. at 6:30.

Mr. McDonald and Mr. A. M. Crown gave interesting reports of their visit to the Public Roads Convention at Gull Lake on July 30. After some discussion it was decided to have the next meeting on Friday August 24 at 6:30.

There are quite a number of matters to come before the next meeting and it is hoped that all the members will be present.

Chautauqua is Huge Success

The Chautauqua which was well patronized this year came to a close on Tuesday night with a lance. The Chautauqua committee are to be congratulated for its success, due to their efforts. Large numbers from far and near took advantage of the opportunity of seeing a high class of entertainment, which is seldom witnessed in a small town. A junior was formed, and a flower drill was staged by the children on the closing night, also a solo by June Ray.

Rev. Wm. Wyman, Ph. D. of Winnipeg preached to a large congregation in the United Church on Sunday evening. Dr. Wyman also conducted the services at Alia and Ripley when both places were filled to hear him. Many of the old-timers of the district were present at the service.

MUNRO CARSON

The marriage took place in Edmonton on Tuesday, August 7th. Mr. Arnold A. Munro, to Miss Irene Carson. Mr. Munro, an employee on the railroad, has lived in the district for a good many years and Miss Carson has been staying for the past year at the home of Mr. and Mrs. Dave Sage, both young people are very well liked.

The couple are spending their honeymoon at Banff and Golden after which they will make their home in Mirror.

NOXIOUS WEEDS

Your co-operation with the Provincial and Municipal authorities is solicited in the control and eradication of weeds. Keep your fields and paddocks free from these unsightly and costly pests. Weeds reduce the yield and lower the grade of your grain and rob the soil of its fertility and cost money in dockage and transportation. Approximately 6,000 cars were required to haul the screenings from one season's crop in Western Canada to terminal markets. Will you not help to reduce this enormous loss?

Give your local weed inspector or the Provincial Field Supervisor in your District every possible support in dealing with the weed problem.

How To Enter Canada's Terrain

Way Has Been Made Easier For The Tourist To Enter Dominion

Tourists enter Canada with an ease and freedom from annoyance which is a constant source of wonder to old-world visitors. Along the 5,000 miles of frontier separating Canada from the United States, automobiles stream across the border with seldom more than a few minutes delay. The expeditiousness with which visitors to Canada clear the Canadian Customs is in part, due to the fact that many of the tourists are now thoroughly acquainted with the formalities at border points and come prepared with the necessary particulars regarding their automobiles and equipment so that the forms may be quickly filled out and verified by the customs officials.

To make the requirements of the Canadian Customs still better known, the National Resources Intelligence Service of the Department of the Interior, at Ottawa, has recently prepared, in co-operation with the Department of National Defence, a summary of customs regulations entitled "How To Enter Canada." Canadians who have friends or relatives whom they expect to visit, can now perform an appreciated service by having this publication forwarded to the intending visitors.

The reciprocal freedom which exists as regards tourist travel between Canada and the United States is exemplified by the fact that no passports are required. Automobiles for purposes of health and pleasure are entered into Canada, duty free, on permit for 60 days, which may be extended to 90 days. For longer periods up to six months, a bond for the amount of duty and taxes ordinarily payable on the car is required. This detail may be conveniently arranged through a customs broker or directly with an incorporated guarantee company authorized to do business in Canada. Pleasure boats may also be entered on permit without duty and are allowed to remain in Canadian waters until October 1.

The privileges of freedom from duty or deposit extend to the tourist's gun, rifle, sporting tackle, golf clubs, tennis racquets, and cameras where these have been previously used and are brought into Canada for the pleasure of the owner. The tourist outfit for personal use such as canoes, outdoor motors, tents, camp equipment, photographic, radio, musical instruments, etc., a sum of money equivalent to the duty and taxes is deposited with the customs officer, and this is refunded if the articles are identified and exported within six months.

The freedom of the Canadian customs as regards tourists' automobiles and outfit is exemplified in another way in that irrespective of the point of entry, the tourist may leave Canada by any other port he chooses. He may enter at east coast and have his automobile and outfit checked out at the Pacific coast just as conveniently as if he had returned to the point of entry. And his automobile licence is good all along the way. The license of any one of the United States is valid for a generous period in every province in Canada. The duration of this privilege varying in the different provinces.

In respect to Canadians entering and touring in the United States, similar privileges exist. Nowhere in the world is there a boundary line where there is less inconvenience for the tourist. When on the road as an international figure who crosses and recrosses the boundary line at will, with extremely little bother or delay and he is welcomed in every country.

During 1927 the California forest service assisted in distributing and planting nearly four million fish fry of different species in the streams.

Fools wait for things to turn up while men go and turn them up.

"You can walk up as quietly as I can, but with this I shall be down again two hours before you." "Yes, but you will still have to wait for me. I am the one who will wait for you." —McGuire's Blatter, Munich.

A Land Of Freedom

View Is Taken That Time Has Come For All Canadians To Stand Shoulder To Shoulder

With the view that the time has come for Canadians of all religious beliefs to stand shoulder to shoulder in a grand confederation celebration of the centennial of freedom, Rev. Col. R. H. Steacy, C.M.G., for seven years grand chaplain of the Orange Order in Ontario, and prominent in war veterans' associations, proposes that Catholics and Protestants should change the respective dates of St. Jean Baptiste Day and the celebration of the Battle of the Boyne, and unite in a yearly celebration on July 1.

Col. Steacy takes the view that Canada has not any one national day. The French-Canadians celebrate St. Jean Baptiste Day on June 24. The Orangemen celebrate the anniversary of the Battle of the Boyne on July 12.

Col. Steacy pointed out that, although celebrated on July 12, there are changes in the calendar, the Battle of the Boyne was actually fought on July 1.

He thought that Orangemen could easily change the date of their annual celebration.

He expressed the opinion that the Catholic Church would be willing to advance the date of their big celebration to unite with Orangemen in commemorating the view that Canada was a land of religious freedom.

Canadian Horses For Troops In Bermuda

Breaks Old Custom As English Is Source Of Supply

The breaking of an old custom, the ever changing relationship between Canada and the West Indies. This was brought to light at the Toronto Hunt Club horse show when Col. J. C. Evans, district veterinary officer of Military District No. 2, who told of having shipped no. 2, who told of having shipped no. 2, who told of having shipped no. 2.

"The department of National Defence, at Ottawa," said Col. Evans, was required by the Imperial Government to buy four horses for the British forces in Bermuda, where the Butcher Highlanders are stationed.

He was in a combination horse for His Excellency the Governor of the Island. A second was to be a heavy charger, and the rest a matched team.

This is a new departure since horses for the Island are usually bought in England. All four purchases were made in Ontario from farmers at Brampton, and Barbours were shipped recently by the Government steamship Canadian Pacific.

Working To Prevent War

Peace Of World Guarded By Women Says C. C. Chapman C.M.G.

Just as it was the mothers and the women of every land who suffered the heaviest casualties in the last war, so the mothers and the women of the present world can come only by international friendship and understanding will be the women of the world.

She was in the opinion of Mrs. Carrie Chapman Catt, whose name recently headed the list of the 12 most famous women of the United States and who is at present the president of the Women's International League for Peace and Freedom. She is quoted by a Hamilton newspaper.

"All around the world is heard the hammer of steel as men build battlements to live with the next war. But so loud, but even more insistently, the women of the nations are transmuting friendship so that there will be no war another war. This is the responsibility of the mothers of the race and they are determined to fulfill it."

Forecasts Good Fruit Crop

Report Shows Apples Will Be Plentiful This Year

The Dominion Department of Agriculture forecasts a 12 per cent. better commercial apple crop this year than last in a report based on returns received on July 1. The estimate is 2,172,250 barrels as against 2,210,600 last year, and an average of 2,255,300 for the five-year period 1922-26.

This increase reflects a heavy crop in British Columbia. The report says that increased crops of cherries, plums and peaches are expected in Ontario. Good crops of all fruits are anticipated in British Columbia.

Selling The Honey Crop

Small Producers Could Make Profit By Selling Direct To Consumer

Beeskeepers are getting much more active in selling their honey. They have found out that it is necessary to do some work, even in selling, after the work of harvesting. They also appear more inquisitive as to prices and rarely give the grocer an opportunity of getting the price at which their crop is to be secured.

Where there is difficulty in selling the output of a small apiculture the best course is to try the neighbors. They all buy sugar, jellies, fruit. The average Canadian eats over one hundred pounds of sugar a year, and if he is given an opportunity, will surely buy five to ten pounds of honey. Some families buy as much as a sixty-pound can of it. But you must let them know that you have it for sale. It is a mistake to ship your honey to some large centre and see the crop melt in the shelves of your grocer, with the profit of handling going to some wholesale firm, while you could just as well secure that profit for yourself.

There are beekeepers who do that, yet, and it is for them that this item is written. Many honey may add to neighbors, and the grocer should be kept supplied and a guarantee given him that the honey is good and will be taken back if any of it is sold when summer comes. But he should also be informed that all good honey is sold in the summer, and that honey is not spoiled by granulation, since in some countries people will not buy it until it granulates.

Favors Return Of Resources

Eastern Paper Thinks Western Provinces Should Have Control

The Ottawa Journal thinks that the western provinces should receive possession of the natural resources and a proper settlement. It thinks the question has been too long, a political football, and says: "The western provinces should have control of their resources. There is no sound ground for having two kinds of revenue from the same source. It only causes friction. As far as the people of Ontario are concerned, there would be nothing but satisfaction at seeing the west dealt with fairly and squarely in the matter."

Manager: "So our employees go into a heated argument over prohibition?" How was it settled?

Boss: "By the 3 o'clock whistle."

How little a man knows of his fellow men unless he lives in a village!

Alimony is the capital price in the matrimonial lottery.

JASPER'S BEGINNING

First Charity: "She wanted me to have a finger in the pie, but I smelt a rat 'n' nipped it in the bud."

Second Bess: "Lor', Mr. Artin, you do mix your semaphores."

While Jasper Park Lodge and Jasper National Park, Alberta, are numbered among the best known places on the continent today, there was a time when Jasper was only a trading post of the North West Company.

That was about 1811. For half a century it was the main support of the trade routes to the mountains and an important post for all persons journeying through the Yellowstone and Athabasca Passes. This camp was erected last year on the site of old Jasper House by the Historic Sites and Monuments Commission of Canada.

Wife: "I don't understand me!" "My wife doesn't understand me!" "I don't understand myself," responded his stenographer sadly.

"Oh, Agoston, I believe we are coming to a tunnel!"

"For shame. You need not think such thoughts." —Kaiser, Stockholm.

Never forget what a man has said to you when he was angry, for he has charged you with anything you had better look up it.

Hubby (coming in late): "I was held up, indeed, my dear! I was so scared that my tongue cleve to the roof of my mouth."

Wife (suddenly): "Yes, I smelt the cleve."

The Year Book is obtainable from the King's Printer, Ottawa, at the price of \$2.00, the price covering merely the cost of paper and binding.

"My wife doesn't understand me!" "My wife doesn't understand myself," responded his stenographer sadly.

"Oh, Agoston, I believe we are coming to a tunnel!"

"For shame. You need not think such thoughts." —Kaiser, Stockholm.

Never forget what a man has said to you when he was angry, for he has charged you with anything you had better look up it.

Hubby (coming in late): "I was held up, indeed, my dear! I was so scared that my tongue cleve to the roof of my mouth."

Wife (suddenly): "Yes, I smelt the cleve."

Predict Synthetic Milk

Scientists Make Announcement At Conference In England

From England comes the news that scientists will shortly be able to make milk from grass, just like the cow's milk. It is not yet indicated by what process the result will be achieved, but it is clear that the scientists are confident, for their declaration has given a severe shock to dairy farmers. The announcement was made at the annual conference of sanitation inspectors, and it must have upset them a little also since most of them are out of a job when there are no more cow byres or dairies to inspect.

The cultivation of milk-bearing grass will doubtless be taken up by the dairy farmers, however. They may even use veteran kins, by whom such grass can be tested. Nobody knows how cows succeed in making milk out of grass, but everybody knows how they do it. The secret is thought to be the best judges of the finest quality of milk-producing grass.

Even if the pastoral scene of some lowing herd winding slowly over the sea is in danger of extinction from the English landscape, it is still possible to contemplate the rural spectacle of a few high-class grass-cutters, each reclining in lawn care with mechanical law grasses fed to them seasonally from the hand of the scientist who will undertake the manufacture of the milk's milk supply.

If Nebuchadnezzar had only known what the future held in store for his kingdom, he would have been a different man.

B.C. Has Turkey Club

Great Interest Taken By Farmer's Wives And Daughters

There are forty members in the newly formed B.C. Turkey Club and its members are ladies. This fact represents approximately the interest taken by farmer's wives and daughters, and ladies, who specialize in turkey raising in the profit possibilities of the business. Prince George is represented, and so is Alberni, Vancouver Island, with members from Oliver, Kelowna, a wide range indeed. Broods listed are Narragansett, Bourbon Odes, Bronze, White Holland and White.

Record Prices The Cheese and Butter—cheese, shipped from Montreal in a single week to foreign markets, reached more than \$5.00 a box, an increase of nearly 2,000 boxes compared with the same week a year ago. Prices paid at country points were records for the year to date.

First Charity: "She wanted me to have a finger in the pie, but I smelt a rat 'n' nipped it in the bud."

Second Bess: "Lor', Mr. Artin, you do mix your semaphores."

"Oh, Agoston, I believe we are coming to a tunnel!"

Urged To Stay In Canada

Head Of Statistical Organization Warns Young Men Against Leaving Dominion

The young fellow who leaves Canada for a bigger job in the United States nowadays is penny wise and pound foolish in the opinion of Roger W. Jansson, head of the Statistical Organization. His analyses of present conditions is that anyone who makes a move is working against his gains in future prospects than he makes in immediate advantage. He arrived here recently in the course of a tour of Canadian cities.

"It always strikes us as unfortunate that we have so many of our capable young Canadians coming over to the States—unfortunately for them," he said. "What happens is that they come to the States full in love with the American life, and remain in the States for good."

"What they overlook is that, while a young man can earn more in the States than in Canada just now, he has nothing like the same opportunities for growth and advancement."

The young man would be paid, but he has nothing like the same opportunities for growth and advancement. There is in Canada, I do not think, a single young man who is not fully at least capacity today, and there is not the room for expansion there that there is in Canada. I do not think I would advise a single young man to leave the States and come to Canada, but I certainly would not advise a single young man to leave Canada for the States. It is infinitely better off in this country."

"All you lack in Canada is iron, for the steel of Canadian iron, particularly those who have the training or ability for leadership. Here is a point to remember. In the United States 20,000 men are employed under the direction of 40,000 executives—100 workers to one executive—while in Canada it is 100 workers to one executive. This means that a young man who has in him the makings of an executive has less potential employment for 99 men."

Considered Good System

Cupping Suits To Prevent Soil Is Plan

Most soils are empty this spring and where there is a surplus of silage it is only a few feet in the bottom. A revival of the good old system of cupping the silage would seem to be in order. Little silage is fed from the time that the cows go on grass till the pasture gets short in July. During this interval a silage cupping system, with a depth of three feet or more, cupping will save the most of this valuable feed. There are several methods. These are several methods. These are several methods. These are several methods.

The New York State method is a little different. Straw is not so plentiful across the line. There are three inches of straw in the straw on one half of the plot. This is covered with tar paper and the silage then grown back with an additional three inches to allow the other side to be papered. The silage is then leveled out and tramped solid. To be most effective, considerable water must be used to seal the silage. Another plan is to save oats thickly on the silage, regular watering and some tramping will insure a dense sward of roots that will keep out the air.

Hubby (coming in late): "I was held up, indeed, my dear! I was so scared that my tongue cleve to the roof of my mouth."

Wife (suddenly): "Yes, I smelt the cleve."

The Year Book is obtainable from the King's Printer, Ottawa, at the price of \$2.00, the price covering merely the cost of paper and binding.

"My wife doesn't understand me!" "My wife doesn't understand myself," responded his stenographer sadly.

"Oh, Agoston, I believe we are coming to a tunnel!"

"Safety First" on the Highways

At the risk of being somewhat tiresome, the writer of this column feels compelled to once again direct attention to the subject appearing as title to this article. Justification for such action, if, indeed, any justification is needed, is to be found in certain well established facts.

In the three prairie provinces last year the number of motor cars registered exceeded half a million.

In all three provinces, Governments and municipalities are straining their resources in the construction and improvement of good market roads and provincial highways, and every mile so constructed or improved results in an increase in motor vehicle traffic and an increase in the speed at which most of the cars will travel.

In the improvement of highways, advances are being constantly made in the direction of making them as nearly as possible "safe" through increases in width, reduction in grades and curves, guard rails at curves and danger spots, and a standardized system of marking the highways, indicating routes, turns, curves, railway crossings, danger spots, etc.

On the other hand, year by year, manufacturers of cars are increasing the power and speed of cars, and with gradual price reductions their use is becoming almost universal. It is true, of course, that four-wheel brakes and other safety devices are being added, and manufacturers are more interested and active in making their cars as nearly "road proof" as they can be made.

The fact to emphasize, and which it is important should be drilled into the minds of every motorist, is that no matter what Governments and municipalities may do in the matter of road construction, and no matter how strongly and carefully motor cars may be built and equipped from the prevention of accident standpoint, the human element remains. Neither roads nor cars can be made "road proof" and the unfortunate fact is that a careless driver is just as great a danger to others as he is to himself. If the highways of the country are to be made safe, it is evident that there must be a decided change in the attitude and conduct of many thousands of motor car drivers, and the public generally.

In an address before the annual convention of the Union of Saskatchewan Municipalities, Hon. R. Latta, announcing the early inauguration of a "Safety First" campaign throughout the Province, stated that he had recently read in a newspaper that someone was either killed or seriously injured every forty seconds in an automobile accident in the United States, and that during 1927 approximately 26,618 persons were killed and 738,700 injured in such accidents. He further referred to the fact that at a conference held in the Parliament Buildings of Ontario it was revealed that 192 automobile accidents cost 422 lives in Ontario, an increase of 124 over 1926, while 3,976 others were injured. It was further reported that fatalities were in the proportion of eight to each one thousand car license.

These are appalling figures and certainly indicate the need of somehow controlling this "first modern convenience." What was the cause of these accidents? Were they preventable? The Canadian Bureau of Statistics in the United States show that 11,765 highway accident fatalities in 1927 were caused principally by motorists, of which 3,763 were caused by inattention, 2,706 as the result of speeding, 2,332 through traffic violation, 1,639 from intoxication, and 1,882 from miscellaneous causes.

About an equal number of fatalities, 11,367 to be exact, were caused principally by pedestrians, of which number 3,038 occurred through children playing in the street or crossing the street, 1,639 through adults crossing the street while walking, 1,819 through inattention, 1,591 as a result of confusion, and 1,250 from other causes.

As compared with more than 23,000 fatalities caused by the human element, there were only 1,250 resulting from fog, snow or rain, 602 from some defect in the vehicle, 538 from speeding, 383 from road defects, 244 from strong lights, 244 from poor street lighting, and 168 from confusion in dining lights. In other words, physical conditions of the road are responsible for 4,684 fatalities as contrasted with over 23,000 for which people themselves are responsible.

Surely such a record provides ample justification for repeatedly urging people to exercise care, to read the Canadian Bureau of Statistics and should be applied, that the Safe way is the Safe way.

Prominent Visitors From Ireland

Marquess of Dufferin and Ava Will Make Tour Of Canada

The Marquess of Dufferin and Ava, nephew of the former of Northern Ireland, who is a son of a former governor-general of Canada, was a passenger on the Empress of Scotland, which arrived at Quebec recently. In a short interview, he declared it was his intention to see Canada from coast to coast on his present stay here. Regarding the industrial situation in Northern Ireland, the marquess declared that, with the exception of a slight improvement in the shipbuilding industry at Belfast, there was little change as compared with a year ago.

Father (to his old friend's pretty daughter): "Good-by, my dear. I won't kiss you, I have such a cold. His son (with alacrity): "Can I do anything for you, father?"

The first typewriter invented by an Englishman early in the 18th century; the first workable pattern, however, was designed in Detroit just 100 years ago.

Cuticura Talcum Is An Ideal Toilet Powder

It is pure, smooth and fragrant and contains antiseptic properties which help to allay excessive perspiration. It imparts a pleasing fragrance and leaves the skin refreshed and cool.

Third Wrigley Marathon

Ernest Vierkorter a Sure Entry in This Outstanding Event
While much dissatisfaction has been expressed by Vierkorter and his manager regarding the shortening of the distance for the Third Wrigley Marathon again to be held in the city, the Canadian National Exhibition this year, there can be no question about his entering as he is fully training in Lake Ontario.

He seems to be carrying more advantage than he did last year, and experts say that he is a little slimmer. This year, at this stage of the game, means little. George Young is the size of a young elephant and seems more or less sluggish in consequence. Both of them will undoubtedly take this off in the course of their intensive training, so that comparisons are more or less impossible at this time.

Vierkorter is a great swimmer and unlike most distance men is fast. Witness his feat of last year when he covered the first five miles under 28 minutes each. That should be enough to win this year's Marathon.

From a spectacular standpoint the Third Marathon will surpass the second. The course will be along the sea wall, and will be in full view of the tens of thousands of spectators who will again flock to see the great event.

The entries are now coming in thick and fast and it is estimated that they will exceed those of last year.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of colds, whooping coughs, influenza, colic, diarrhoea and dysentery come on so quickly that often a little of each will be before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. The mother must be of such aid to her mother during hot weather as to keep the child from getting the stomach and bowels and are all the more so, if by medical directions or by mail at Dr. Williams' Medicine Co., Brooklyn, N. Y.

London will add 72 double-decked omnibuses, fitted with pneumatic tires, this year.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is best for driving worms from the system.

Many Farmers Join Pool

Estimated That About Half The Wheat Crop Of West Contributed By Pool

The Canadian Wheat Pool, which embraces 112,000 Canadian farmers, continues to add to its membership. In a single day this morning, 1,000 farmers were received at head office covering a total of nearly 100,000 acres of grain.

Under the Canadian Wheat Pool system farmers voluntarily sign contracts in which they agree to market all their wheat through the pool for a period of five years. About half the wheat crop of Western Canada is controlled in this way, and sales by the Pool average over a million dollars for every business day of the year. It is claimed that the Pool has increased the price of wheat to the farmer without increasing the price of bread to the consumer.

Canada's Fox Farms
Forty thousand silver fox farms were registered in Canada from various fox farms during the past year. The report of the Canadian Silver Fox Association shows, Saskatchewan registered only 780 of the pups, but having reached the program, they are retained in other sections of the Dominion.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, and not only a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without any growth of the child will be retarded and its constitution weakened.

Did Not Find Out
A popular Scotch doctor who was very sensitive about his age, passed away suddenly. One of his friends suggested to the mourners that the secret would be disclosed on the plate in the casket. But when they looked at it, it all disclosed was:
Dr. Caleb McNab.
One hour from 2 to 4.

Summers? Use Minard's Liniment.
W. N. U. 1743

There is nothing that has ever taken Aspirin's place as an antidote for pain. It is safe, and physicians wouldn't use it, and endorse its use by others. Sure, or several million people would have turned to something else. Get the real Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red.

New Settlement Area

District Near Edmonton Made Available By Building Of Old Branch Line

The penetration of branch lines of railway into the sparsely settled area north and east of St. Paul de Metis has opened up a fertile district 50 miles square.

The district has taken on new life. In 1927 the railway was extended from St. Paul to Elk Point, and this year is being pushed on from Elk Point to Hienburg, a distance of 20 miles. It is expected that steel will be laid from the junction of the St. Paul-Edmonton branch near Ashmont to Hienburg, a distance of 20 miles. This line passes through a country containing many free homesteads and large blocks of class-5 agricultural land. This area is the Saddle Lake Indian Reserve, which was taken over from the Indians by the 12th Regiment of the Department of Immigration and Colonization, and over 50 families settled thereon. This settlement has proved a most successful one.

Recipes For This Week

(By Betty Barclay)

GINGER ALE LEMONADE

4 lemons.
1 pint ginger ale.
1½ cups water.
1 cup sugar.
Place a small block of ice in a pitcher. With the juice of four lemons mix one cup of sugar, one one-half pints of water, and one pint of ginger ale. Pour into pitcher and thoroughly. Allow to stand few minutes before serving. (Serve 6 persons.)

A REAL MEAL SALAD

½ cup nectarine raisins.
1 cup cold cooked meat, cut in cubes.
1 tablespoon granulated gelatine.
¼ cup cold water.
1 cup boiling water.
1 tablespoon vinegar.
¼ teaspoon salt.
¼ teaspoon pepper.
Sprinkle paprika.
1 teaspoon Worcestershire sauce.
1 cup diced celery.

Pump and drain raisins. Soften gelatine in cold water for 5 minutes, then dissolve in boiling water. Add vinegar, salt, pepper, paprika and Worcestershire sauce. Let cool. When mixture starts to thicken stir in the pumpkin and the rest of the salad. Turn into a cold wet, square pan. When firm cut in cubes. Arrange on lettuce. Sprinkle diced celery over top. Garnish with a sprig of myrtle and a dash of paprika.

The Friend Of All Sufferers.
Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on the lips of the people and can be found wherever required for.

When some men bury the hatchet after quarrelling they go right out and dig up an axe.

Granite monuments of the Egyptians were cut with copper chisels.

The confirmed bachelor prefers to settle his affairs out of court.

Phantom Radios

Devise Whereby Radio Fans Can Broadcast Through His Loud Speaker

The genius of Earl W. Davidson, a railway telegraph operator, who likes to tinker around with radio sets in his off hours, has made it possible for the long suffering radio fan to shout his sentiments right into his loud speaker with the assurance that people far miles around will hear his protest.

The workings of the phantom radio, invented by Davidson, are very simple. The effect is to transform any loud speaker into a broadcasting microphone whose waves will ripple out into the air on the wave length of the station into which the set is tuned.

At his home at Terre Hill, Penn., Davidson has talked through his receiving loud speaker to his neighbors as far as fourteen miles, getting his words in edgewise during the lulls of broadcasting programmes from Chicago, Pittsburgh and New York.

He says the secret of his invention is in the arrangement of the circuit, in which he uses a crystal and three ordinary tubes.

Davidson came to New York last week to demonstrate the "Phantom Radio." He has gone back home to continue his experiments.

Marks Alberta's First Mine

Cairn Erected in Lethbridge By Canadian Historical Society

The memory of a father of Confederation and the foundation of one of the most important commercial and coal mining areas in the West, was recalled by the celebration at Lethbridge, on July 18. The Canadian Historical Association, which erected a cairn in the town to commemorate the opening of the first coal mine in Alberta, in 1872, a period truly remote in the history of the west, before the Canadian Pacific Railway had appeared to open up the country to settlement. In Lethbridge, the Lethbridge Historical Society, the Natural Resources Department of the Canadian Pacific Board of Trade of Lethbridge, and the City of Lethbridge and others took an interest.

Demonstrated Her Skill

Winnipeg's first and only aviator, Eileen Magill, demonstrated her skill by carrying to a height of 4,000 feet with the Winnipeg Flying Club's Moth plane, and tail-spinning for the first time since she took her first solo flight.

Average Size Of Farms

The average size of a farm in Manitoba, Saskatchewan and Alberta is 318 acres with 147 acres under field crops including 56 acres in wheat, the average value \$14.62.

Corns cause much suffering, but Hollister's Corn Remedy offers a speedy, easy, and satisfactory relief.

People who don't spend their money as we think they should are miserly.

HERCULES

PERMANENT BUILDING PAPER

What's between
Indoors and Outdoors?

The world is divided into two parts, outdoors and indoors. Between the two lies the human element. The answer has a vital effect on those who are indoors.

If wind and dampness can be kept outdoors, naturally indoors be comfortable and healthful to the occupants.

You can solve this problem with Hercules Permanent Building Paper. In three grades, x, xx, and xxx—Hercules is tested and proven damp proof, water proof, tear proof. Test it yourself. A line will bring samples. Write us.

MYSTERY ENDS BY FINDING BODY OF LOEWENSTEIN

Boulogne-sur-Mer, France. — The finding of the body of Captain Alfred Loewenstein, missing Belgian military aviator, has cleared up most of the mystery surrounding his disappearance from a cross-channel strait on July 4.

French and Belgian authorities will still have to determine whether Loewenstein accidentally fell from the plane as it flew 4,000 feet over the English Channel, or deliberately crashed upon the exit door and plunged to his death.

But the ugly rumors that the financier had perpetrated a gigantic hoax and was still alive were definitely set at rest by the finding of the body.

The battered body was found floating face downward ten miles off Cape Gris Nez, by the Boulogne fishing schooner, Capt. Jean Moreau, and was readily identified by a wrist watch engraved "Capt. Loewenstein, 35 Rue de la Science, Brussels."

Otherwise the body was unrecognizable, as it was in an advanced stage of decomposition.

The body was clearly only in underwear, socks and shoes, the latter bearing the name of an English manufacturer. There was a severe wound in the abdomen and both feet were broken.

At the Boulogne morgue Dr. Boulanger made a formal post-mortem examination, and the mayor of Calais, Leon Vincent, drew up a signed official statement recounting the circumstances of finding the body of the missing aviator. The result of the examination of the remains. No official conclusion was made public.

It is believed here that now that the mystery of the financier's disappearance has been solved, the French government will begin an official inquiry to establish whether death was accidental or a suicide, and if only of Captain Loewenstein's fellow passengers in the plane will share any responsibility for his death.

Bavarian Town Was Damaged By Floods

Oberammergau, Famous For Its Passion Play, Was Submerged

Below Oberammergau, the Bavarian town, famous for its Passion Play, has been partly demolished by flood.

The town was submerged when earthshakes caused the river Isar to overflow. Bridges were swept away.

Trenches had to be built in relief work until dawn, because the local power plant was flooded.

As floods increased the Oberammergau district to the southwest of Tölz, Germany, near Nüssen, was elated.

Considering Air Insurance

Canadian Companies Believe People Will Want This Protection

Ottawa. — Canadian insurance companies are considering aerial forms of insurance for civilians insuring themselves in aviation. It is learned recently a conference of actuarial and insurance medical authorities is said to have discussed the matter, realizing that soon the man who drives his own plane will be in the same category as the man who drives his own car, so far as the demand for insurance is concerned.

Motor Boat Beats Train

German Export Drives Craft Nearly Mile a Minute

Cologne, Germany. — Fritz von Opel, German sportsman and motorist, has just driven his experimental car in a race over a distance of 10 kilometers (6.21 miles) in the Rhine.

Opel drove his boat over the distance in six minutes and 12 seconds, 25 minutes faster than the train running along the river.

Federal Government to Raise Pigeons

Ottawa. — The Dominion government is going in for pigeon-breeding. The object is not, however, to increase the food supply of the country. It is to breed and train pigeons for purposes of communication. The department of national defence is to have charge of the work.

Glasgow, Scotland, was recently so bad because some of its municipal street cars exceeded the speed limit.

Receives New Appointment

Dr. Delury Of Saskatchewan University Will Go To Manitoba

Winnipeg, Man., Dec. 1. — Dr. Delury of the University of Saskatchewan will succeed Dr. R. C. Wallace as commissioner of mines and as professor of geology and mineralogy at the University of Manitoba. The appointment was announced by the government.

Dr. Delury expects to make the necessary arrangements with the University of Saskatchewan to make it possible to take up his work here September 1, when Dr. R. C. Wallace leaves to take over the position of president of the University of Alberta.

Dr. Delury is well known in Winnipeg and Manitoba. He was for many years the right hand man of Dr. Wallace in the department of geology and mineralogy at the University of Manitoba. In that capacity he rendered valuable service to the province. One of his latest contributions was a voluminous report which he prepared two or three years ago for the industrial development board.

It is only a year ago since he left to organize the department of geology at the University of Saskatchewan, as professor in charge of that department.

Dr. Delury is a graduate of the University of Toronto and of the University of Minnesota, and was in charge of the department of geology in the University of Idaho before he came to Manitoba in 1913.

Will Export Alberta Gas

Has To Pipe Waste Gas To Saskatchewan, Manitoba and Montana

Lethbridge, Alta. — Alberta's production of waste gas seems closer to solution and it appears to be in the piping of the surplus gas to Saskatchewan and Manitoba cities, and the cities of Montana.

In an interview here, Hon. Charles Stewart, minister of the interior, gave it as his opinion the shipping of gas 800 miles to Winnipeg, serving intermediate cities, including Moose Jaw and Regina, was feasible.

Again exportation of gas from the Rivers' field, southeast of this city, is now possible under Federal permit. The Range Oil and Gas Company has spooled in number well on the Rogers road just south and east of the 60,000,000 foot producer, and the plans of this company and the later of the company of Great Falls, which will drill the wells, are to have gas flowing through their pipe line into Montana by winter. A pipe line will be built to the Montana boundary. It is announced, either to link up with the present pipe line to Great Falls or as a separate line into that city.

Libel Action Settled

Action Was Brought By Cardinal Byrne Against London Newspaper

LONDON. — Settlement of a libel action brought by Cardinal James Byrne against the London Times newspaper was announced in the King's Bench division.

Counsel stated that a paragraph appeared in the newspaper in which the cardinal was a man who excused murder of Kevin O'Higgins, first Free State minister of justice, on the ground that he was an "English hireling."

Counsel said that the defendants never suggested for one moment that the statement, which had been made by a contributor, could be justified and promptly did the honorable thing by apologizing for having published it.

Receiving Royal Pictures

Gift of King George Reprises Portraits Destroyed By Fire

Ottawa. — Pictures of King George, Queen Mary, Prince of Wales, King Edward and Queen Alexandra, were received by Eric Brown, director of the National Art Gallery, on behalf of the Canadian Government. These portraits are the gift of King George and will replace the pictures of the late royal family which were in the old parliament buildings but were destroyed when the buildings were burned in 1916.

Will Tour Canada

Quebec. — Fifty members of the National Chamber of Commerce, of Great Britain, headed by Counselor James Stansfeld, president of the Chamber, arrived here and immediately proceeded to Montreal by train. The party will tour Canada, visiting in Montreal two days before going to Ottawa.

Russia Buys Canadian Wheat

To Russia Are Announced

Winnipeg. — Further sales of Canadian wheat to Russia were announced at the grain exchange here. That country has taken another 1,500,000 bushels, bringing its total purchases during the past fortnight to 9,500,000 bushels.

A good portion of the grain was No. 3 Northern Manitoba. It is credited with the purchase of one million bushels of Durum wheat recently, mostly from the local market.

Demand from other European countries remains indifferent partly because of increased native supplies and partly on account of prospects for large crops on the North American continent this year.

Feeling Against Nobile

Leader Of Italia Expedition Under Criticism In Norway

Oslo, Norway. — Feeling against General Umberto Nobile, leader of the Italia expedition, is making itself felt in Oslo.

The newspaper Aftenposten removed a picture of the general from a show case during the day as threats had been made to destroy it. Several Danish explorers have proposed Fridtjof Nansen, chairman of a committee of honor to investigate Nobile's leadership of the expedition. Nansen declined this but said that he thought there were several errors in Nobile's expedition that need closer investigation.

Will Export Alberta Gas

Has To Pipe Waste Gas To Saskatchewan, Manitoba and Montana

Lethbridge, Alta. — Alberta's production of waste gas seems closer to solution and it appears to be in the piping of the surplus gas to Saskatchewan and Manitoba cities, and the cities of Montana.

A pipe line will be built to the Montana boundary. It is announced, either to link up with the present pipe line to Great Falls or as a separate line into that city.

Conservatives have been returned to Vancouver six. Victoria elected St. Basil, Burnaby, South Vancouver, North Vancouver, Chilliwack, Coquitlam-Neave, Coquitlam and the Islands.

The Liberals gained Cranbrook from the Conservatives, while the Conservatives have gained all the Vancouver seats. Five from Liberals and one from the now defunct Provincial party; Chilliwack from Liberals; Coquitlam from Independents; Burnaby from Labor; South Vancouver from Labor.

Mrs. Mary Ellen Smith was defeated by H. H. Pouley, in Esquimalt. Of the 48 seats contested in the provincial election of 1921, in the Legislature, the Liberals carried 23 in the last contest; the Conservatives 17; Labor 3; Provincials 3; Independents 1; and Independent Liberals 1.

Norwegian Journalists Visiting Canada

Party of representative Norwegian journalists now touring Canada, under arrangements made by the Canadian Pacific's Department of Colonization and Development—visiting the various Norse settlements in the Dominion and gaining first-hand impressions as to immigration prospects.

Statistics Show Crime Increase In Canada

Convictions Recorded In 1927 Higher Than In 1926

Ottawa. — Crime is increasing in Canada. Latest official statistics available show that for the year ended September 30, 1927, the number of convictions recorded reached total of 212,075 as compared with 187,561 for the preceding period ended September 30, 1926.

The number of indictable offences returned for the year under review, according to the Dominion Bureau of Statistics, was 23,258 charged with 18,835 convictions. Summary convictions for non-indictable offences amounted to 182,810.

Will Succeed Dr. Wallace

Winnipeg. — Dr. J. S. Delury, of Saskatoon, will succeed Dr. R. C. Wallace, as commissioner of Mines of Manitoba, and as professor of geology and mineralogy at the University of Manitoba. Dr. Delury expects to take over his duties when Prof. Wallace leaves to take the position of Professor of Mines at the Alameda University.

PREMIER-ELECT FOR B.C.

Will Succeed Dr. Wallace

Winnipeg. — Further sales of Canadian wheat to Russia were announced at the grain exchange here. That country has taken another 1,500,000 bushels, bringing its total purchases during the past fortnight to 9,500,000 bushels.

A good portion of the grain was No. 3 Northern Manitoba. It is credited with the purchase of one million bushels of Durum wheat recently, mostly from the local market.

Demand from other European countries remains indifferent partly because of increased native supplies and partly on account of prospects for large crops on the North American continent this year.

Clark's Status Discussed

Hon. Dr. S. F. Tolmie, leader of the Conservative Party in British Columbia.

Duties Of British High Commissioner In Canada Debated In House

London. — The British Government's new appointed high commissioner in Canada, Sir William Clark, who is sailing for Ottawa shortly, and the duties of the newly created position were discussed in the House of Commons when P. J. Hannan, Conservative, asked whether the High Commissioner would take precedence over the representative of all foreign powers at Ottawa, and if in submitting proposals respecting Irish commercial interests to the Government of Canada, he would have full diplomatic support of his Majesty's government in Britain.

Right Hon. L. C. S. Amory, Dominion Secretary, in replying, reminded the questioner of the similar case in Britain, which high commissioners in Britain, who ranked immediately after cabinet ministers, but not before foreign ambassadors.

Mr. Tolmie, who had stated that the high commissioner of Great Britain in Canada, would be authorized to make representations on commercial questions to the Canadian government when instructed to do so by his Majesty's government in Great Britain, the minister said.

Canadian Militia Promotions

A Number Of Transfers and Promotions Are Announced

Ottawa. — The rank of "Brigadier" recently introduced in the British Army has been adopted in the Canadian Militia, with effect from July 1. The temporary rank of "brigadier" is in substitution for the temporary rank of colonel-commandant and colonel-in-chief.

Orders promulgated from defence headquarters announce a number of important promotions in the Canadian Militia. Among them are the following:

Major E. H. Cape has been promoted to the rank of lieutenant-colonel and to command the Vancouver Regiment with regimental headquarters at Vancouver, B.C. Vice lieutenant-colonel H. G. Wolfe Morton, M.C., who has been transferred to the reserve of officers.

Major W. W. Henderson has been promoted to the rank of lieutenant-colonel and to command the 2nd regiment "The Alberta Mounted Rifles," with regimental headquarters at Pincher Creek, Alta. Vice lieutenant-colonel J. H. Jackson, transferred to the reserve of officers.

May Establish Trade Treaty With Germany

Four Would Lead Canada's Export List, Says N. B. Palmer

St. John, N.B. — Canada export trade with Germany will be greatly increased by the "favourable" trade agreements which the Dominion is now endeavoring to establish with that country, said Max H. Palmer, of Calgary.

Palmer, newly appointed assistant Canadian Trade Commissioner to Hamburg, who was here in connection with the signing of the Maritime provinces with a view to developing Maritime export trade with Germany.

In speaking of Canada's trade conditions with Germany, Mr. Palmer stated that at the present time Canada is discriminated against as a result of existing trade agreements, which particularly affected the export of flour as well as other commodities. Should the trade treaties being advanced by the Canadian Government go through successfully, Mr. Palmer is of the opinion that four would lead Canada's export list to Germany.

ASSASSIN OF GEN. O'BRIEN IS IDENTIFIED

Mexico City. — Police headquarters unconditionally announced that the assassin of General O'Brien had been identified as Jose de Leon Toral, an art student, aged 23, a native of Lugo, in the State of Galicia.

He is said to have lived at Guadalajara, but to have come to Mexico City six months ago seeking work. Police said they found upon him the marks of the Catholic priest, Miguel Augustin Prohjarro, who was executed in the attempt to assassinate O'Brien with a bomb last November.

It was said that de Leon Toral returned to the State of Galicia, where he insisted throughout his grilling that de Leon was responsible.

Federal district police arrested and held for investigation Emilio Cordero, proprietor of the restaurant where O'Brien was killed at San Angel, and all twelve employees of the place.

Government censorship of the press was still in force.

St. Universal General says that the mother and wife of the assassin have been arrested and are being held.

In a signal statement, President Porfirio Elias Calles declared that the assassin of General O'Brien had admitted the motive of his crime was religious fervor.

There were numerous rumors in the capital of unpardonable and other killings, but all proved to be untrue. A release statement prevailed everywhere, but neither the newspapers nor the government had any information of trouble breaking out anywhere in the republic.

The department issued an official communique saying that the army would guarantee the public peace.

President Calles was surrounded by a strong guard. All saloons were closed, as were theatres and other places of amusement.

Many of those known to be opposed to O'Brien, fled from Mexico City before the fury of his friends and supporters, which were kept in bounds only by police precautions. The headquarters of Luis Morales, Secretary of Labor, and O'Brien's political opponent, were surrounded by a guard at the instance of President Calles, who feared that there might come attempts at violence.

GENERAL NOBILE TO RETURN HOME IN QUIET MANNER

Kings Bay, Spitzbergen. — The man who came from Italy in a giant blimp and circled the North Pole to the applause of a world which hopes for the discovery of the driftless Italy, will return home on a coal freighter, avoiding all possible ports of call, it was announced by one of his associates.

The general will travel over an unknown route to an unannounced destination where he will be picked up by a motor-driven schooner and taken to Germany or France. It was said he would leave in a few days.

Nobile will not travel with the men who went into the Arctic with him—fifteen men, of whom two were left corpses on the ice and six others blown away in the wreckage of the Italia to possible death.

The seven men who were rescued by the ship after the crash of the Italia had been brought out by the Swedish aviator, Captain Elmer-Paul Landberg, will return at least a part of the way, aboard the Italia's launch ship, Citta Di Milano.

Nobile will avoid touching at any port in Norway. An unfavourable sentiment has been manifested in Norway toward the Italian polar expedition since two of Nobile's companions, Captain Umberto Nobile and Filippo Zappalà were picked up on the ice to tell how Dr. Magnus, Swedish scientist, had been left behind at his own instance to die by a grave scooped out of the ice.

Mariano and Zappalà arrived with other rescued Italians on the Krassin recently.

The Citta Di Milano probably will proceed to Narvik as soon as possible with the survivors of the expedition to King's Bay to continue the search for twelve lost men—six with Nobile and six, including Nobile's Amundsen, in a French ship, which left Tromsø, Norway, June 18, to search for Nobile.

Dr. Carl von Schönbom indicated the government would order the rescue expedition under command of Captain Thorsberg to return immediately to Sweden.

Hail Damages Crop Of Wheat King

Experimental Plots Of J. C. Mitchell, Saskatchewan Wheat King

Dalhousie. — Prospects of J. C. Mitchell, Saskatchewan Wheat King, regarding the international crown, were seriously jeopardized by the worst hail storm experienced in this country, which ruined many crops.

At Dalhousie, a French experiment, which left Tromsø, Norway, June 18, to search for Nobile.

Dr. Carl von Schönbom indicated the government would order the rescue expedition under command of Captain Thorsberg to return immediately to Sweden.

No Claims Paid This Year

Reparations Now

Ottawa, Ont. — Although the War Reparations Commission has made its report which was made public last season, the government does not intend to pay the claims of a year. Part of the money for his purposes was included in John James A. Robb's surplus. There was much dispute among the city claimants at the size of their awards. These may be revised by the Government, but the 3,000 small claimants will have to be satisfied with what Reparation Commissioner F. Riel found due them.

Over Million For Memorial Fund

London. — The fund contributed by London, the world over, for a national memorial to the late Queen Alexandra has reached a total of \$1,165,000. The visible memorial will take the form of a bronze group designed by Alfred Gilbert, and it will be erected at Marlborough House, opposite St. James Palace, but the bulk of the fund is to be used to endow the present nurses' pension fund.

Have Restored Titles

Prague. — The Czechoslovakian government has introduced a measure in parliament restoring medals and titles which were abolished after the revolution.

That "prospects for increased im-
migration into Canada are excel-
lent" was one of the most important
statements made by E. W. Healey,
K.C., upon his return from an ex-
tended tour of England and Euro-
pean capitals. The president of the
Canadian Pacific Railway believes
Canada is progressing in the matter
of immigration, but intensified ef-
forts are essential, he considers, to
offset erroneous impressions abroad
that Canada does not require new
settlers.

A record run between Winnipeg
and Quebec was recently made by
a special Canadian Pacific train
when passengers from the Orient
were, through delay caused by land-
slide, in danger of missing their
connection with the C.P.S.S. "Em-
press of Scotland" at the eastern
port. The train covered the 1,579
miles in a little over 30 hours,
whereas the schedule time for trains
between these two cities is 43 hours.
The passengers had crossed the Pa-
cific on the C.P.S.S. "Empress of
Russia" and were taking advantage
of the 21 day Orient-to-Europe sur-
vice of the company.

The United States has invested
in Canada \$2,500,000,000, according
to the Bankers' Trust Company of
New York, which has just com-
pleted a survey of Canadian indus-
try and the amount of United States
capital invested. Of the total sum
invested, \$1,200,000,000 in bonds,
and the remainder in farms, mor-
tages, small businesses, industrial
enterprises, banking and private
loans. It is computed that more
than 300 branch factories
operated in Canada by United States
concerns in 1919, and a great com-
pany in 1920 and 1921, and that later
in 1922 the number of these came to
700.

A collie dog is reported to have
saved the life of a London West
girl, while accompanying the child
to a nearby store. On the way she
stopped on the C. P. R. railroad
tracks in the path of a westbound
train. Realizing the child's peril,
the dog threw himself against her
with sufficient impact to knock her
clear of danger, and was cut to
pieces by the train before he could
regain safety.

The girl's mother tried to discour-
age the dog from going when the
danger was noticed, but he went,
and was the means of sav-
ing the child's life, and died hero-
ically as a result.

**Another
Record
Month**

July Sales
Greatest of
Any Month
In 18 Years

AGAIN in July—when motor car sales generally slacken
—Graham-Paige broke all sales records for any month
in eighteen years; the last week in July being the greatest
week in the company's history. And—for five consecu-
tive months, Graham-Paige has established new all-time
sales records.

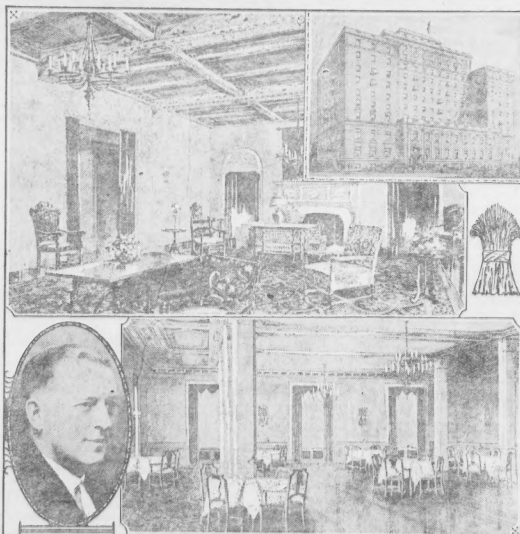

Five chassis—sixes and eights—prices ranging from
\$1145 to \$3540. Car illustrated is Model 614, five-
passenger Sedan, with 4-speed transmission, (standard
gear shift), \$1810. All prices f.o.b. Windsor, taxes paid.

GRAHAM-PAIGE**New Hotel for Queen City of the Plains**

Upper—Entrance of the new Hotel. Lower—The Dining Room is of Italian design. Inset—The new Hotel Saskatchewan and T. R. Chester, the manager.

One of the most beautiful buildings in Western Can-
ada, the "Hotel Saskatchewan," Regina's new
hotel, which was officially opened by E. W. Healey,
President of the Canadian Pacific, on May 24. In
the architects have sought to provide the maximum
of convenience and comfort for its guests and to
obtain the most pleasing architectural effect.

Regina's need for a new hotel has been felt
heavily for some time, as the city's importance as
capital of the province which furnishes 60 per cent.
of the Dominion's wheat output, has been steadily in-
creasing. The erection of a hotel in Regina was inter-
rupted by the war, and the removal of the old steel
structure less than a year ago, marked the first step
towards the realization of Regina's dream of a new
modern hotel, which at last has been brought about
through the enterprise of the Canadian Pacific Rail-
way.

Pleasing artistic effects have been achieved
throughout the interior of the building. The public
rooms, which are numerous and spacious, each have
a character of their own. The Tea Room and Ro-

lunds, for instance, have a Spanish atmosphere. The
walls of the former are of antique mottled and decu-
rated plaster with a base of stone and a carved
wooden mantel, while the ceiling is a wood rib and
beam ceiling, painted and decorated.

One of the most comfortable and homelike rooms
in the hotel is the library, situated on the first floor.
The walls are of paneled wood with enclosed book-
cases.

The exterior is no less beautiful than the interior.
It is designed in Georgian style, the first two stories
being faced with Tyndale or Fossil stone quarried
near Winnipeg. The main entrance is particularly
striking with its tall Corinthian pilasters and arched
windows.

There are 216 grand bed-rooms with baths, and
space for 36 more on the two top floors of the build-
ing which, as yet, have not been finished.
On account of the nature of the soil, the hotel was
created on a reinforced concrete mat with structural
steel plate girders embedded in the concrete. It is
eleven stories high and absolutely fire-proof.
